

ESG Program Management

Manage ESG goals and initiatives, align to standards and frameworks, and track program KPIs and metrics via dynamic materiality assessments and action plans

As organizations continue to realize the impact of day-to-day business practice on the broader community, they're prioritizing ESG metrics and initiatives. However, getting started with ESG can have its challenges: lack of insight into current state, trouble navigating the current frameworks and regulations, and fragmented data sources, risk domains, and opportunity area need to be addressed. OneTrust ESG Program Management helps by streamlining relevant first and third-party ESG data collection, reporting, and analysis.

No Coding or IT Involvement

Configuration through intuitive drag-and-drop user interface

Global and Multilingual

200 languages supported across the platform

Out-of-the-Box Capabilities

Pre-built questionnaires, assessments, and frameworks

Identify Risk & Opportunity

Flag and manage internal and third-party ESG risks & opportunities

Easy Integrations

500+ pre-built connections with existing business solutions

Global frameworks - automatically populated with your data metrics

CSRD

Unify ESG Program Management activities

OPERATIONALIZE ESG PROGRAM

- Conduct materiality assessments and engage stakeholders to define ESG goals and KPIs
- Navigate, assess, and compare different governance frameworks, latest news, and ESG updates
- Reduce manual processes to allow people to focus their time and energy on the most critical projects
- Automate processes that extend ownership & accountability across all departments with the organization
- Address and remediation risks using pre-built assessment templates and a central third-party data exchange

CENTRALIZE ESG DATA COLLECTION

- Connect to internal and external ESG data sources and automate the collection and maintenance of ESG data
- Use integrations, tailored assessments, and data import to centralize information
- Decrease time to make a data-driven decision with accurate information and to respond to new regulations or requirements
- Leverage DataDiscovery tools to bring unseen risks to the surface without manual intervention
- Implement workflows to automate manual, repetitive tasks and improve efficiencies for data collection

STREAMLINE FRAMEWORK REPORTING & ANALYSIS

- Get a holistic & integrated view of data from all sources across the business
- Auto-populate reports across various frameworks (CSRD, GRI, SASB, CDP, WEF, SEC's Proposed ESG Disclosure Rules etc.
- Create a defensible audit trail, evidence of action and compliance
- Configure module dashboards to enable teams to easily view and monitor progress
- Go from manual and backward-looking yearly reporting to real-time monitoring, analysis, and reporting

PRIORITIZE INITIATIVES & TAKE ACTION

- Program benchmarking provides comparisons against similar orgs, best practices by industry, region, and company size
- Prioritize key initiatives, define goals, and create action plans
- Drive action with workflows and task management
- Make accurate data-driven decisions without investing time in research or development
- Identify likelihood of future outcomes with predictive analytics through AI and machine learning, driven by historical data and current initiatives
